

What's New in Field ID 2009.6

compatible with:

- ✓ **Field ID Mobile 1.13**
- ✓ Field ID Mobile 1.12

NEW

Release Date: August 9th, 2009

N4 Systems is pleased to introduce Version 2009.6 of Field ID Web and 1.13 of Field ID Mobile.

This release focuses on usability improvements including better pagination and login screens. The ability to manage your Field ID account has been expanded to show you information on your storage and user limits.

Below you will read about the major improvements that we have made to Field ID in this release. For an overview of all features please be sure to join or watch our recorded Webinar.

Overview of New Features in Field ID Web 2009.6

✓ Improved Pagination

Based on customer feedback we have implemented more advanced pagination. When viewing the results of your search or any paginated list you can now quickly jump to any page in the results. As well a cleaner layout makes it easier to navigate from page to page.

✓ Record Address Information on Divisions

When adding a Division to a Customer in Field ID you can now enter contact and location information specific to that division. This will help keep track of your customers and if needed can be included on your PDF Certificates and Reports.

✓ New Branded Login Screen

Everyone will receive a new branded login screen. We have taken our existing login screen and went back to the drawing board in an attempt to make it easier to use for both your employees and customers. Moving to this design will also help with a upcoming feature (Hint: color customization).

✓ New Customized Field ID URLs

Everyone's custom login URL has been moved to a much easier to remember format. Currently the branded login URLs look like:

<https://fieldid.com/fieldid/login/your-company-id>

The new branded login URLs look like:
<https://your-company-id.fieldid.com>

All of your old bookmarks and links will still work for the next few months however we suggest that you update them to the new URLs.

✓ Upload Attachments when identifying assets

When you are identifying an asset you can now upload attachments. This will allow you to attach documentation or images that your customers will need for safety and traceability purposes.

✓ File Storage Limits

Each Field ID system now has a storage limit. Look under “Manage System Settings” in the Administration section to see how much storage you have used and your total available. Once you get close to the limit the administrator at your company will be notified. Please contact sales@n4systems.com if you require more storage capacity.

✓ More Details under Manage System Settings

Under the Manage System Setting you will see information about the number of employee accounts you have created and your total number available based on your Field ID plan. Look for even more information in upcoming releases.

Overview of New Features in Field ID Mobile 1.13

✓ Sorted Drop-Downs

Drop downs on the mobile are now sorted in alphabetical order. This includes drop downs such as Comment templates and Product Types.

✓ Improved Auto-Update

The process of Field ID Mobile checking and updating to the newest version has been greatly improved. This will ensure that you are always on the newest version of Field ID.

✓ Improved Underlying Architecture

Some of the most exciting improvements for us are one's that cannot be seen. We have implemented a number of changes under the hood that will improve speed and stability. We are always

implementing these changes in a effort to keep Field ID Mobile as fast and usable as possible.
